Response to Election

Applicant's election with traverse of Group I, claims 1-5 and new claims 31-36 in the reply filed on 4-12-2004 is acknowledged. The traversal is on the ground(s) that some claims in restricted groups belong in the elected group. This is not found persuasive because all claims were restricted based on a broadest reasonable interpretation of the claims and that the combination as written did not require the particulars of the subcombination as written. New claims 31-36 will be examined.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 31 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Fishbein et al.(U.S.Pat.6,535,754). Fishbein discloses a lever coil sensor for respiratory and cardiac motion that shows all the features of the claimed invention.

Allowable Subject Matter

Claims 2-5 and 32-36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Katz and Feldman are cited to show structure similar to the claimed invention.
